

Everyone should follow their own path.
Our goal is to make sure you get there.

RIPPLE TAX AND FINANCIAL SERVICES

Tax compliance for corporations,
partnerships, individuals and trusts

Financial counseling provided for
small business clients and individuals

Estate and financial planning services

Ripple Tax & Financial Services, Inc. was formed by Joel Brown, CPA, JD in May of 2009 on the principle that there is more to servicing a client's needs than simply the commodity of a prepared income tax return.

The purpose that drives Ripple Tax is our commitment to satisfy you, the client, and serve your needs by listening, understanding and relating to your goals and objectives. We use the most current technological innovations and best practices wherever possible to help our clients achieve their goals.

We believe that the most valuable service that a CPA provides to their client is that intangible understanding that allows us to guide you on the path toward your goals with a peace of mind.

We will take the time with you to foster that understanding, compile all of the relevant tax information, analyze your income and deductions and finally use this information to help you optimize business decisions and tax savings strategies.

Ripple Tax will accomplish this for you while complying with all Federal and State laws and at the same time fully take advantage of every potential tax savings allowed by the tax code.

In the ever changing landscape of tax law, Ripple Tax provides comprehensive tax services focused on tax compliance (filing your tax returns) and on proactive tax planning and tax savings.

We are there for you all year, not just during the filing season, to advise you on how income and deductions will affect your tax liability. This approach, where we communicate with you throughout the year, places us in a position to know about tax significant events and allows us to proactively help you implement tax savings strategies.

Whether you're a corporation, partnership, LLC or sole proprietorship, we'll ensure that you receive the most advantageous tax treatment and guidance with your federal, state and local tax compliance.

Ripple tax will help you navigate the different estate planning options and assist you with the aid of your attorney to prepare a working estate plan. If you do not have an attorney Ripple Tax works with several estate planning and can refer one to you

based on your need.

If you are appointed as an executor of an estate it might seem an overwhelming and daunting responsibility. Ripple Tax will help you navigate the record keeping and tax filings required and help you understand how the

tax laws will affect you and the heirs. We will be there to give you peace of mind as you handle the affairs of a deceased loved one.

Finally, Ripple Tax can help you to understand the many different

types of Trust entities and help you decide if formation of a Trust is in your best interest. Once formed, Ripple Tax will help you with the necessary record keeping and tax filings for your Trust entity.

Ripple Tax and Financial Services believes that everyone should follow their own path.

Our goal is to make sure you get there.
